“Our partnership
with AMADA has
fueled two decades
of growth.”

Keith Adams
General Manager

Ron Kotloff
Founder and CEO

Ron Kotloff
President and CEO, AEI Fabrication

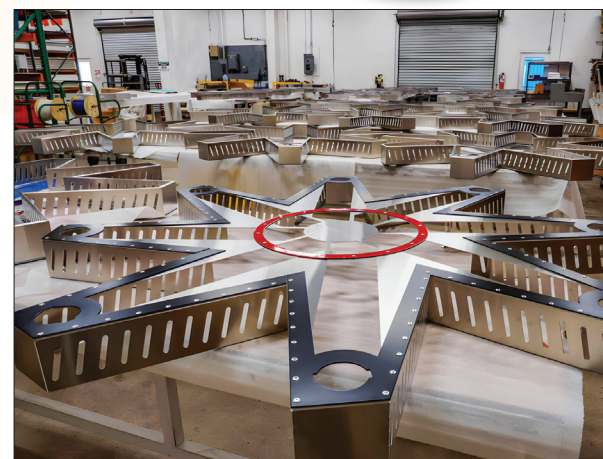

AMADA delivers integrated solutions, empowering customers to harness process synergy across various operations such as fabrication, stamping, welding, and machining—supplying every metalworking need our customers require.

Launched in 1994 as a lighting company, AEI initially outsourced the majority of metal fabrication. A pivotal partnership with AMADA over two decades ago transformed AEI into a highly automated precision metal fabricator, specializing in precision sheet metal components for various industries. Today, AEI Fabrication's daily production exceeds 12,000 parts, a success attributed to prioritizing automation.

Among AEI's advanced machinery is the LC 2515 CI AJ punch/fiber laser combination machine from AMADA. This state-of-the-art equipment allows for unattended operation, consolidating multiple processes within one work envelope, including laser cutting, punching, countersinking, forming, marking, and tapping. To further optimize productivity, the CI AJ is paired with an RMP 3015N TK system, enabling automated part unloading and sorting.

For ultra-compact robotic bending, AEI acquired the EG 6013 AR, ideal for precise bending of small parts, reducing the need for human intervention and mitigating the risks associated with handling small, intricate components.

Ron Kotloff, President, and CEO of AEI Fabrication, emphasizes the pivotal role of automation in today's business landscape, stating, “Automation is key to succeeding in today's world. And, AMADA machines and automated systems are the best-built and supported solutions in the industry.”
