

“We chose Amada for their constant efforts to push technology to its limits. Now, we’re cutting our .030” CRS parts 4 times faster than ever before!”

— Mike Lund, VP/General Manager
Quick-Way Manufacturing, Inc.

4 Times Faster.

THE WORLD’S MOST PRODUCTIVE FIBER LASER.

www.amada.com

Quick-Way Manufacturing (Euleless, Texas) is an ISO 9001:2008 certified sheet metal fabrication/metal stamping plant that has been in business since 1961. The company has over 50 full time employees and specializes in quick-turn sheet metal parts. With ever-increasing pressure to compete in a world market, Quick-Way turned to Amada. Mike Lund, VP/General Manager reflects on that decision. “We partnered with Amada to secure the fastest machine on the market and achieve lights-out processing. Quick-Way specializes in materials 10 gauge and thinner. The Fiber laser allows us to cut up to 4 times faster than we’ve ever cut before! Amada’s Fiber laser and automated loader combine to increase our capacity while giving us a world-class edge to compete.”

Amada’s FOL 3015 AJ Fiber Laser and Advanced Automation Provide:

- **Lights-Out Processing** (Fiber laser technology, high-speed shuttle tables and automation combine to provide unmatched productivity while reducing lead-time and cutting costs).
- **Energy Efficiency** (FOL-AJ consumes approximately 1/3 the amount of energy required by a 4kW CO₂ laser and about 1/4 the amount compared to a 6kW CO₂ laser).
- **Maximum Flexibility** (The AMNC/IPC control reads ahead 30 blocks of G-code — enabling it to respond quickly and adjust efficiently for high-mix/low-volume production).
- **Unmatched Speed, Accuracy, and Edge Quality** (Advanced 3-axis linear drive motion system and an innovative beam delivery system are engineered to keep pace with the cutting speeds and capabilities of the Amada-designed fiber resonator).

ASLUL300 Load/unload system — Automation is essential to maximize machine potential and achieve lights-out production.

Reflecting on his partnership with Amada, Lund states, “Quick-Way has seen significant growth during the last 5 years in a very difficult manufacturing market. We attribute much of that growth to having the very best equipment available and having direct access to leading-edge technology. Amada continues to be a vital partner in our success.”
