**Notes:**

1. FW12.0 and FW12.01 now support CatiaP3V5R16 (sp0), if CatiaP3V5R16 (sp4) or CatiaP3V5R17 is installed, there will be conflicts, which may sometimes crash the system.
2. SolidWorks2007/2008 and Solidedge18/19/20 should be installed on separate computers; installing them in the same PC will create problems.
3. SolidWorks2007 cannot be installed in Windows Vista.
4. FabriWIN12.x Pro/E WildFire2 OLE function failed in Windows Vista.
5. Inventor11 cannot be installed in Windows Vista.
6. FabriWIN12.x OLE function supports CATIAV5R16 sp0, except in Windows Vista.
7. SolidWorks parts in Open&OLE function cannot be previewed in FabriWIN12.x with SolidWorks 2008, 2009.
8. When OLE with Inventor2008, 2009 processes a part, each bend will have 3 solid bend lines in FabriWIN12.x.
9. 64-bit compatibility based on applications running in 32-bit emulation mode & pre-qualified hardware.
10. Tentative release date.
11. Mechanical Desktop, DWG Format.
12. 64bit & 32bit Note: All OLE functions (using SolidWorks, Inventor & SolidEdge) require that the version of the CAD/CAM operating systems be identical for the best chance of compatibility.
13. Solidworks 2015 is compatible to Patch version 2014.1.02 and greater.
14. Software version NOT tested on Windows 10.
